

Integra[®]
POOL COVERS

Safety. Security. Strength.

Your swimming pool is an investment and the ultimate source of fun and relaxation. Why not give it years of reliable protection?

The custom pool covers from Integra automatically extend and retract as needed. With just one flip of a switch, you not only control the covering and uncovering of your pool, but you also enjoy many incredible advantages. Our ASTM-certified automatic pool covers provide an effective safety barrier to protect your kids and pets, they keep out dirt and debris for a healthier swimming environment, and protect your financial investment.

Plus, because an automatic pool cover is so easy to use, you are more likely to operate it on a daily basis, thereby getting the most out of all the benefits it has to offer.

Less stress. More happiness.

Integra
POOL COVERS

Ease of Maintenance. Energy Efficiency.

Keep out dirt and debris and make your swimming environment healthier. Translation? You will spend less time cleaning your pool and more time enjoying it.

Extend the swimming season, reduce water evaporation, keep the heat in, increase the longevity of your water chemistry and save wear and tear on your pump. Pool covers are the most effective method of reducing water losses from evaporation. When in use, solid pool covers can reduce evaporation by more than 90 percent and, in the case of heated pools, save between 50 and 70 percent of pool heating costs. Some utilities offer rebates of up to \$200 for qualified covers. Check with your local water utility to see if they offer a rebate to purchase and install a pool cover.*
